CRACKED CODES OF VIRTUAL FOOTBALL BETTING

A THREE STEP GUIDE TO SUCCESSFUL VIRTUAL GAMING

BY

ROTIMI ALABI

REAL VALUE: N3000

AUTHOR'S NOTE

This ebook is on virtual football betting –a new form of betting that has gone viral.

That's why this publication is **strictly** only for those who are already playing virtual football betting since it will be easier for them to understand what I'd be talking about.

But I make no promises –do not expect much. What I would teach here is only a clear blueprint that if built upon would make you more money from virtual than you thought was possible.

I know winning virtual bets sometimes could depend on luck but to be more successful in your virtual you don't only need luck. You need a combination of Preparation + knowledge + luck.

The knowledge and preparation is exactly what this book can give to you –but not luck.

If you have not played virtual bets before, please this book is not for you –you may not understand much of what I'll share here.

With that out of the way.....

Let's get into serious business.

INTRODUCTION

Hi, I am Rotimi Alabi of wikendbet.com. Welcome to this special e-book on a practical guide on successful virtual football betting.

I'd love to share with you a little secret that could make you good money betting on bet9ja virtual football.

No doubt that the most popular forms of virtual are dog races and football. Bad for dog races, I have no interest in dogs –they bite so I don't know much about them. But when it comes to virtual football betting, I would tell you what works and how to succeed betting on virtual football.

In Nigeria as in other West African countries around, virtuals now trend the online betting industry. It's so rampant and extremely popular among casual punters because of the fun of making quick-quick money in matter of seconds that comes with it and this simply gives the game it's thrill.

How does it really work?

The virtual betting system simply imitates the behavior of real events by performing something similar. So in effect, it's not real. It's only a technique used to represent real sporting events by means of a computer program.

But this doesn't make our task of predicting events any easier.

This is because the style of programming differs with bookmakers and the kind of algorithms they use are well coded such that they alter continuously until a fresh one is written. With this sort of difficulty, one cannot possibly crack all of them.

So I focused on the simplest and most popular –bet9ja virtuals.

In bet9ja virtual football a match ends in 60 seconds with a break of about ten minutes before the next set of fixtures begins.

Guess that was easy, you know that.

But here's what you haven't taken your time to work out.

Remember we aren't super hackers and so we cannot possibly decode the algorithm of the programmer. But if you are creative enough, you can tell what could possibly happen next and that alone takes you a step closer to winning.

How?

Haven't you observed that specific odds controls a particular set of outcomes? or you haven't noticed that the particular number a given match appears on goes a long way to influence a specific outcome?

Good

Now what if you are able to predict accurately the exact number a team would be on the next fixture and the specific odds it would command and equally the positions (home/away) it would appear on also. Imagine the multiple ways you could use this knowledge to your advantage.

This brings us to the most crucial tools you should use in forecasting successful virtual football.

This virtual betting tools are:

1. Anticipation –knowing what to expect.
2. Know your markers
3. Reading patterns.

Take it easy –you'll get to understand every bit of it shortly.

You see, everything you see on your virtual TV screen in your bet shop is all function of a computer program. But here's the tricky part.....

You'd agree with me that it is extremely difficult if not impossible for a computer to do something just by chance. Such that every task a computer performs, it has been programmed to do just that exact thing.

What this simply translates to is that.....

A computer will always follow its instructions blindly and is therefore completely predictable (In fact, a computer that does not follow its instructions in this manner is broken).

The question is how does all this help out in our virtual gaming?

The answer to that is exactly why you are reading this book now. To help you understand what I'll share with you, you need to know how this virtual betting algorithm works.

You see, bet9ja makes use of a kind of device called random number generator (RNG) to generate a sequence of numbers which cannot be reasonably predicted other than by a random chance.

Thus, what you see in your virtual screen as goals during a virtual match or as results after the end of matches is all done by this RNG. To the computer program, it's generating numbers, but you the player interprets those numbers as results or goals.

But that's not the angle am driving to.

Here is what am trying to say.....

This random numbers are generated in a predictable fashion using a mathematical formular and some kind of precalculated tables that acts as an algorithm such that they seem to produce sequence of numbers that appear random and unpredictable.

So in reality, the results you see are not necessarily as random as you had earlier thought. They are discernible to an extent if you are used to finding patterns.

And that's exactly what I'll teach you here. To be specific, I'll teach you how to make money out of bet9ja virtual football system. Bet9ja virtuals is relatively new and that's why I easily take advantage of them using knowledge from my experience and research.

You want to know how you can beat this guys like I do, simply scroll down let's get started.

THREE SIMPLE STEPS TO SUCCESSFUL VIRTUAL GAMING

It is common knowledge that an opponent who knows the future cannot lose. This is true in war as in virtual bets also.

This is exactly why the very first thing I'm going to teach you here would be how to anticipate and know exactly how every single team would be positioned at the next league week.

This is very important and the bulk of your success on virtual football betting depends on mastering this process.

Ready?

Good, below is a given league week fixture that we are interested in knowing exactly how the next league week would be like.

| | 1 | X | 2 | 1-X | 1-2 | X-2 | OV1.5 | UN1.5 | OV2.5 | UN2.5 | Pos | Teams | Points |
|----|-----------|------|------|------|------|------|-------|-------|-------|-------|------|--------|--------|
| 1 | ASV - ARS | 3.90 | 3.21 | 2.03 | 1.76 | 1.34 | 1.24 | 1.20 | 4.35 | 1.72 | 2.09 | 1 SWA | 22 |
| 2 | LIV - SUN | 1.45 | 4.34 | 7.12 | 1.09 | 1.21 | 2.70 | 1.21 | 4.31 | 1.72 | 2.09 | 2 WHU | 21 |
| 3 | BOU - MNC | 4.83 | 3.31 | 1.82 | 1.96 | 1.32 | 1.17 | 1.21 | 4.28 | 1.73 | 2.07 | 3 EVE | 20 |
| 4 | WAT - STC | 3.52 | 2.96 | 2.28 | 1.61 | 1.38 | 1.29 | 1.25 | 3.82 | 1.87 | 1.90 | 4 MNC | 18 |
| 5 | CHE - NWC | 1.43 | 4.38 | 7.64 | 1.08 | 1.20 | 2.78 | 1.18 | 4.66 | 1.63 | 2.24 | 5 LIV | 16 |
| 6 | EVE - SWA | 2.14 | 3.07 | 3.76 | 1.26 | 1.36 | 1.69 | 1.24 | 3.98 | 1.82 | 1.96 | 6 TOT | 17 |
| 7 | WBA - MNU | 3.67 | 3.05 | 2.17 | 1.67 | 1.37 | 1.27 | 1.23 | 4.06 | 1.81 | 1.96 | 7 CRU | 17 |
| 8 | WHU - TOT | 2.86 | 3.21 | 2.51 | 1.51 | 1.34 | 1.41 | 1.27 | 3.65 | 1.91 | 1.86 | 8 STC | 16 |
| 9 | NOR - CRY | 3.52 | 2.96 | 2.28 | 1.61 | 1.38 | 1.29 | 1.25 | 3.82 | 1.87 | 1.90 | 9 ARS | 16 |
| 10 | SOU - LEI | 1.64 | 3.60 | 5.77 | 1.13 | 1.28 | 2.22 | 1.22 | 4.21 | 1.76 | 2.03 | 10 MNC | 15 |

League 2000 - Week 12

TOT 3 - 2 WBA MNU 0 - 2 EVE SWA 1 - 0 CHE

But first you must pay deep attention to the match at NO 1. Why? Because it controls the others in a way.

When you look at the NO 1 fixture, try to find out the marker i.e that team that is repeated constantly at NO 1. You got it? It's easy to find –just check in the previous league week any which one of ASV and ARS that was at NO 1 is definitely the marker.

For this particular example, ASV is our marker (I know so because it's been at NO 1 since the season began from league week 1 to the current league week 12).

This implies that- ASV at no 1 would take an away opposition from No 10 to set at NO 1 at away in next league week while the opponent takes the home slot.

Do you grab?

Just look at the screen shot –What am saying is that ASV must go to away to meet LEI in the next league week while still maintaining her No 1 position.

That's for No 1.

To get the others is easy, just think of diagonals [/]. Just like that small sign you saw in bracket, ARS at no 1 away will take on LIV at No 2 home to play at No 10 in the next league week at reverse positions.

Same for SUN at No 2 away that must take on BOU at No 3 home to play at No 9 in the next league week at reverse positions.

Do the same for MNC at No 3 away that must take on WAT at NO 4 home to play at No 8 in the next league week at reverse positions.

Now you know how it's done. Take out your pen with a sheet of paper, then work out the rest.

If you do this properly as I've said you should have a next league week in this form.

League 2014 - Week 13

2 CRY

SOU 1 | LEI

ASV 3 | 0 ARS

LIV 1 | 1 SUN

Hope you got it that way.

Perfect!

NOTE: Remember every league runs for 38 weeks. So this particular pattern works only from league week 1 to league week 19. Then from league week 20, the marker (ASV) stays permanently at NO 10 till the end of season.

This brings us to something really crucial: KNOWING YOUR MARKERS.

No matter what pops up on your screen, there is always a marker. That marker can be spotted either on NO 1 or NO 10 depending on the which half of the current league season is running (as explained above).

For the example above, ASV was the marker. Nevertheless, it's not the only marker. There are several other ones like MNC, LEI, WAT, NWC, STC , BOU and a few more.

You should know that....

- ✓ Different markers control other teams in different ways. It's not enough that a team won and won with a score-line, a pattern controlled that specific result at that particular time and that is why you see different outcomes for the same matches in different seasons.

You know how to locate this markers and anticipate now. But what you don't know is how to recognize patterns that this different markers come with and probably how to use this little knowledge of anticipation to make you money.

For this purpose, I'll share a system that always play out anytime ASV is the marker.

Look and study the snapshot below carefully.

Zoom the image for a better view if you like.

League 2665 - Week 17

LIV 0-1 SUN

BOU 2-2 MNC

WAT 0-1 STC

CHE 2-1 NWC

Recall that ASV is our current marker and it controls many patterns and system.

I'll show you a key to a system that works around EVE whenever ASV marks.

An indicator to know this system with EVE is running is that EVE must lose at home by a lone goal and the away team at immediate top of EVE must lose as well.

If you look at the snapshot again, you'll see that EVE lost at home at NO 6, the away team at immediate top (NWC) lost too at NO 5 and our marker is ASV.

So we are ready to go.

But not so fast. You need to know what to expect first whenever this kind of pattern arise.

WATCH OUT FOR THIS

If EVE must lose at home when ASV marks, they always lose either [1:2] or [0:1] and both score lines behave differently in the next league week.

And I'll show you how.....

CASE ONE:score line of [1:2] really works

After losing with that score line of [1:2] this patterns must play out in the next league week.

- ✓ EVE must win at away in the next league week with a sure over 1.5
- ✓ EVE must play out a correct score of [0:2] or [1:2] in the next league week.
- ✓ Immediate bottom team at home [WBA] gives you a guaranteed over 2.5
- ✓ That immediate top team that lost at away [NWC] must lose at least two more times until they come back at home.
- ✓ Immediate top team at home [CHE] would go away to lose/draw and play a sure BTS
- ✓ Check out for the team EVE lost to at home –In this case it was SWA–
 - SWA will play sure BTS with over 2.5
 - SWA must win/draw at home in the next league week.

- SWA must play out a correct score of [2: 1] or [2: 2]

Our next task now is to make our predictions for the next league week (13) using this unlocked patterns.

But don't forget that our focus is strictly on EVE at NO 6 and the teams up and below EVE at NO 5 and NO 7 respectively of league week 12.

And those are the only matches will would bet on in league week 13.

League 2006 - Week 12

2 CRY

50U 3 1 LEI

ASV 3 0 ARS

LIV 1 SUN

That's the new set of fixture for league week 13.

The very first thing to do now is to spot the position the teams appeared so as to place your bets correctly.

At NO 5: SWA VS WBA

AT NO 6: NWC VS EVE

AT NO 7: STC VS CHE

The next thing to do is

Put our predictions together from the possible patterns we have unlocked for EVE.

(Check out what would be written below for correspondence with those patterns marked with bullets above)

Now from the first pattern, EVE must win at away with a sure over 1.5.

From the second pattern, EVE must command a specific correct score of [0:2] or [1:2]

From the fourth pattern, NWC must lose in this current week –and this simply confirms our predictions for EVE. Since in the current week NWC plays EVE.

SO WE ARE SURE OF THE CORRECT PREDICTION FOR THE GAME AT NO 6 (NWC vs EVE).

So let's try out same technique for the NO 5 game (SWA VS WBA)

Going back to the same patterns in page we have that:

From the last pattern, SWA must play sure BTS, over 2.5, home win or draw, and a correct score of [2:1] or [2:2].

From the third pattern, WBA must play out a guaranteed over2.5 –and this confirms our predictions for SWA as regards over 2.5. Since in the current league week SWA plays WBA.

SO WE ARE SURE OF THE CORRECT PREDICTION FOR THE GAME AT NO 5 (SWA vs WBA).

One more game is now left

And that's from the fifth marker where CHE must lose/draw at away with a sure BTS.

AND THAT CONCLUDES OUR PREDICTIONS.

So now after all our hard work let's see what the results for league week 13 says.

Next page please....

06:27

| | | | | SCORE | 1 | X | 2 | 1-X | 1-2 | 2-X | OV2.5 | UN2.5 | GG | NG |

League 2666 - Week 13 League 2666 - Week 13 SUN 0-1 BOU ARS 0

Oh my God!

Can see what just happened? Every single game we predicted for NO 5, NO 6 and NO 7 played out just EXACTLY as we had forecasted.

Check it out yourself:

- at NO 7 : CHE lost at away with a BTS
- At NO 6: EVE won at away with a correct score of [0:2] and sure over 1.5
- At NO 5: SWA played out a home win/draw, BTS, over 2.5 and correct score of [2:2]

You confirmed it?

Awesome right?

Now this is not wizardry. It's simply a clear case of someone who didn't really depended on luck to win. He knew his markers, he anticipated and he simply recognized patterns.

Imagine the kind of instant money you would have made only on those correct score predictions with odds of 14.3 and 13.6 respectively.

Do the math in your head –what do you see?

Now multiply the odds for this correct score with two other predictions that we have earlier selected.

You could have earned over 50K with a N1000 stake. You still can (you'll get to know how).

But if you are still in doubt that this was luck, I'll prove to you how consistent this system works with another instance where it played out again.

Check this one out yourself

League 2666 - Week 18

ASV 0-1 WAT CHE 1-0 BOU EVE 1-2 LIV WBA 4-1 ARS

Look at the snapshot again, and you'd find out that that same system is about to play out in this league week 18 again.

Same indicators as before: EVE lost at home with a [1:2] scoreline, The immediate top team at away [BOU] lost as well, and our marker is still ASV.

AS ALWAYS - :score line of [1:2]

After losing with that score line of [1:2] this patterns must play out in the next league week.

- ✓ EVE must win at away in the next league week with a sure over 1.5
- ✓ EVE must play out a correct score of [0:2] or [1:2] in the next league week.
- ✓ Immediate bottom team at home [WBA] gives you a guaranteed over 2.5

- ✓ That immediate top team that lost at away [BOU] must lose at least two more times until they come back at home.
- ✓ Immediate top team at home [CHE] would go away to lose/draw and play a sure BTS
- ✓ Check out for the team EVE lost to at home –In this case it was LIV–
 - LIV will play sure BTS with over 2.5
 - LIV must win/draw at home in the next league week.
 - LIV must play out a correct score of [2:1] or [2:2]

Now I'll show you what played out in the next league week.

| 06:24 | | | | | | | | | | | | | |

| 8 | LIV | 2-1 | WBA | 8.85 | 1.85 | 3.38 | 4.47 | 1.20 | 1.31 | 1.92 | 1.78 | 2.01 | 1.71 2.10 |
| 9 | BOU | 1-2 | EVE | 9.27 | 3.81 | 3.14 | 2.09 | 1.77 | 1.35 | 1.25 | 1.78 | 2.01 | 1.65 2.20 |
| 10 | WAT | 1-1 | CHE | 8.23 | 5.79 | 3.71 | 1.62 | 2.26 | 1.27 | 1.13 | 1.71 | 2.06 | 1.82 1.96 |

Exactly as we predicted.

- At NO 8 : WBA played out over 2.5, LIV won/drew, played BTS, over 2.5 with a correct score of [2:1]
- At NO 9 : BOU lost, EVE won at away with over 1.5 and a correct score of [1;2]
- At NO 10: CHE lost/drew at away and played out BTS.

Oops! We came through with a 100% accurate prediction again. You still think we got lucky? Think again.

Just look at the highlighted odds in the snapshot for those various outcomes. Just as the system predicted, everything played out exactly and that same odds would fetch you money anytime you see this system playing out with ASV as the marker.

You see how our predictions played out 100% correct –that's not luck you can agree with me. A degree of knowledge and preparation came in handy for this success.

That's exactly what I want you to do. When you go next to a bet shop, take your time to observe and take snapshots that would help you study patterns at home. If you really want to make money, take this exercise seriously.

You may not start winning at once, but it doesn't matter because the moment you find patterns that are consistent enough to use then you'd hit bet9ja so hard that I pray they'll be able to pay you out.

This particular system with EVE as the key is currently in play now. I hope it's not obsolete by the time you get this material. But even if it is, and a fresh code has been written –it simply means there is a pattern to unlock –FIND IT AGAIN.

This are not easy to look for but if you know what to look at for (as you now know), only then you can get lucky.

And that's how things works out in virtual. Luck sometimes plays a role, I understand but you'd more successful if you depend on yourself sometimes by knowing your markers, anticipating and recognizing patterns and systems.

Alright.....

How about I show you something else.

What do you notice at NO 1 and NO 10? They all drew right?

When you see this kind of results where NO 1 and NO 10 draws, you need to watch out for this as well.

WATCH OUT FOR THIS on the screenshot

- NO 9 (BOU) team at away wins by a lone goal.
- NO 8 (MNC) team at home to win with BTS

If this NO 9 and NO 8 plays exactly as I show you now, then we've got money to make the next league week.

This is what must play out the next league week.

NEXT LEAGUE WEEK

- ✓ The away team at current NO 9 must draw at next week NO 2 with the home team at current NO 10.
 - With a correct score of 2-2
 - And sure BTS
- ✓ The home team at next league week NO 10 must win.
- ✓ NO 9 and NO 2 at next league week must play out sure BTS
- ✓ NO 1 and NO 6 at next league week must play out sure NO BTS

Guess you are now familiar with what to look out for in the next league week. So simply scroll down to check if the game played as we had predicted it would.

League 2006 - Week 14

WAT 2-2 SUN

CHE 2-1 MNC

EVE 3-2 STC

Whoa!

Everything played out exactly.

- ✓ The previous away team at NO 9 (BOU) played out a draw at NO 2 with a correct score of 2-2 of odd 12.1.
- ✓ Check out NO 9 and NO 2 played out BTS
- ✓ Check out NO 1 and NO 6 played out the NO BTS too.
- ✓ Do you see the game at NO 10? it won at home just as we forecasted.

That's the fact about playing virtuals using the three step guide. You do your homework first by studying and looking out for patterns that are consistent.

That's all and you start making money like mad.

For this particular system I just shared now, it works with any marker. All you need to do is wait and watch for our first guessing starting point to play (that's the simultaneous draws at NO 1 and NO 10), When it does, you check out for the key to this system which is NO 9 at away to win by a lone goal and NO 8 at home to win with BTS and you are ready to go printing money.

This is not voodoo or magic. It's just unlocking patterns. As simple as that.

The interesting thing about this exercise is that the patterns are periodic (which means that the sequence will eventually repeat itself again and again). But guess what, only punters who know what to expect and use the three step guide get to take advantage of this loop holes.

So you just keep making money whenever the pattern shows again.

Imagine how much you'd have made from that game above. Now imagine making that same huge amount of money over and over.

CHECK THIS ONE OUT YOURSELF

CRY 3-2 ARS

SUN 2-1 BOU

SOU 0-2 MNC

TOT 2-2 SWA

Ooops~! We did it again. 100% correct.

Check it out you'll see that.....

- ✓ The game at NO 2(TOT) drew as predicted.
 - It played out a correct score of 2-2
 - And sure BTS
- ✓ The home team at NO 10 (SUN) won
- ✓ The NO 9 and NO 2 played out a sure BTS
- ✓ The NO 1 and NO 6 played out a sure NO BTS

You see why am so delighted to share these super helpful resources with you? This is because the great thing about what you are learning now is that it's not just a trick or a secret, it's a solution bro.

This stuffs are so easy to do yourself. All you need is take sufficient records from previous games and study through them. You see old men walk into the pool office to forecast draws right? They may likely end up spending the entire day there. Doing what? Looking for patterns that are consistent enough to control a draw.

Add that flair to your virtual gaming. Finding patterns in virtual is the way to go, you don't need to depend on luck. All you need to do is prepare enough and seize opportunities when it comes.

Your first step is to look for a guessing starting point –a guessing starting point could be a particular game you have observed to play in a particular way. When you see such games again it serves as your starting point for predicting patterns.

Take adequate recording and try to find out if the outcome the game plays out controls other results.

For example, say I have a guessing starting point with the game between SOU VS STC. Now for this fixture and the reverse fixture too, the away team barely loses.

So the question to ask becomes –did a game in the previous league week control the outcome of that particular game? Or did the event appear in a specific number? Or does our guessing starting point control any specific result in the next league week?

Answers to this questions will definitely prove effective in finding a pattern around that game or even a key to a possible system.

The message is.....

Go out there and start finding out keys for yourself. When you find one, you don't need to hang around the bet shop, just ask a friend to notify you whenever he sees a marker you are interested in.

There are tens of systems available using the ASV marker and hundreds of systems could be gotten from the other markers as well. I can't go on and on giving you more systems because this e-book could get lengthy and boring. But the good thing is that you can do it yourself because you now know how to, and what to look at for.

Currently a team of analyst are working on the full systems for five other markers:

- MNC
- WBA
- LEI
- BOU
- STC

Once it's set, you would be the first to know.

But until then, don't forget the three important things you just learnt now from this material:

1. Anticipation – try to effortlessly know how teams would play out in the next league week.
2. Know your markers.
3. Learn to recognize patterns.

Consider and take them seriously when next you are in the bet shop and you will see yourself make money effortlessly out of thin air.

What you just learnt from this e-book is durable with a potential worth of tens of thousands of naira. You see, am not just giving you my systems to play with – because once the bookie notices it, they will definitely block it and reseed their data.

What am doing is giving you something superior by showing you how to unlock this systems and keys yourself such that the bookmaker have to way of stopping your progress –as long as there are virtual games, there are patterns. Find it and make yourself money. If your system stops playing, find another.

Am sure you'd be more successful than your friends who don't have a copy of this material. If you do exactly as I say, you'd get to a totally new and different level of virtual football gaming that would see you make more money than you have ever made since you started playing virtuals.

But this doesn't change my opinion about virtual betting. It's exciting I know, but it's not the real thing and much more volatile and uncertain than normal bets.

My professional advice remains: **STAY AWAY FROM IT IF YOU DON'T REALLY UNDERSTAND HOW IT WORKS.**

Just a friendly advice from a friend.

CONCLUSION

Thank you for reading. Hope this material and the knowledge herein makes your virtual gaming as incredible as it can get.

If this material has helped you in any way, or you have a great idea to share with me, I'd love to really hear from you.
